## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicants' arguments, filed 6/20/2008, have been fully considered but they are not deemed to be persuasive. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objections are either reiterated or newly applied. They constitute the complete set presently being applied to the instant application.

2. Applicant's arguments, see pp. 10-11, filed 6/20/2008, with respect to the rejection(s) of claim(s) 1-7 under 35 USC 102 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made as follows.

3. The rejection is withdrawn due to the claim amendments removing sugar as additive specie, on which the rejection was based. The rejections that follow are necessitated by the amendment to the claims and the introduction of new claims.

### ***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

Art Unit: 1614

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

6. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

7. Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Inoue, et al. (WO 2004/067521 A1; priority date 2003 Jan 27; IDS 3/30/2007 reference) and Ogata et al. (US 4,780,465; 1988).

This rejection is necessitated by the claim amendments and the addition of new claims 8-10. Inoue teaches compounds of formula (I) (p. 4, starting line 26), including the elected compound (p. 8, lines 31-32); solutions and suspensions (p. 27, line 33—p. 28, line 1), and aqueous parenteral solutions (contains water) and suspensions, which may contain additives, such as saline or glucose, to make solutions isotonic (p. 28, lines 5, 7-12). Inoue does not teach the elected compound, in an aqueous solution with glycerin, mannitol or boric acid. Ogata teaches NaCl, glycerin, mannitol, boric acid and glucose are isotonic agents for aqueous solutions (col.3, Table I). It would have been

Art Unit: 1614

obvious to one of ordinary skill in the art at the time of the invention to substitute any one of glycerin, mannitol, or boric acid for glucose in the aqueous parenteral solutions taught by Inoue as isotonic agents. The motivation would have been the art-recognized equivalence of the compounds for the purpose of adjusting isotonic strength of the aqueous solutions.

### ***Conclusion***

8. No claim is allowed.

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
